FAQ

Q. Is Mama Nature's safe for my kids and pets?

A. ***Yes!*** There are no poisons, or harmful chemicals in our formulation. Just 90% garlic juice, 5% cedar oil, and some food grade preservatives added. You can use the yard as soon as the product dries, which is usually under 1 hour.

Q. How does it work and how much do I use for my lawn?

A. Mama Nature's is a concentrated product containing garlic and cedar oils that repel mosquitos and ticks. You apply the product with a hand pump sprayer (we sell a sprayer on our web site) creating a fine mist and cover the entire yard, spraying grass, tree canopies and landscaping (walking briskly back and forth).

8 ounce bottle – Combine with 1 Gallon water for 6-8,000 square feet yard

16 ounces - 2 bottles – Use 1 bottle at a time and reuse as needed to cover 12-14,000 sf

Q. How does Mama Nature's differ from other products that contain Permethrin?

A. Permethrin has been licensed by the EPA since 1977 and has a few warnings on it's label: It kills bees and fish and many beneficial insects. It cannot be sprayed near streams, lakes, fish ponds, etc. Many sellers of products containing this chemical are often shy about telling consumers about what all it kills aside from mosquitoes.

Q. What is the suggested frequency of treatments for the best protection all summer?

A. Depending on your climate, we suggest spraying every 18-21 days. In northern climates, we recommend starting in May, and continuing through the middle of Sept. or until the first hard frost. This is approximately 6-7 applications over the summer. Whereas in the South, we recommend starting in April and continuing through the Fall while temps are over 50 degrees at night. This is approximately 8-10 applications.

DEET FREE SOLUTIONS FOR MOSQUITOS AND TICKS!

Your home is your castle, and you want to be able to enjoy as much time as you can outdoors with your family. Unfortunately, mosquitos and ticks have other plans and can ruin an outing. Our repellent products are eco-friendly, plant based and DEET-free.

Mama Nature's Mosquito Juice has combined garlic and oils to create a long-lasting, all-natural mosquito spray that is very easy to use. The active ingredient of garlic juice in this formula is a well-known insect repellent that is especially repugnant to mosquitoes. To us humans, the garlic odor will dissipate after a few minutes; but mosquitoes have a much better sense of smell and they will notice the smell for weeks after application and stay away. In addition to this powerful repellent action, the oils in Mama Nature's Mosquito Juice will kill larvae in standing water, thus reducing the number of future adults.

- First application should cause an 80-85% reduce in mosquitoes and a second within 21 days should result in a 90-95% reduction
- No waiting period for re-entry into application area
- Not harmful to kids, pets, pollinators or aquatic life.

Mosquitoes can make any outing miserable. The buzzing, biting and ensuing itching are irritating. There is more misery that these insects can cause because the vector diseases to most mammals. Our Deet-free, essential oil-based spray repellent gives you all the protection you need without the nasty smell, stickiness and harmful ingredients of those toxic bug sprays. In fact, the lemongrass in Mama Nature's gives this spray an almost perfume-like smell that will appeal to everyone. We are proud of the quality and confident of the effectiveness of this American made product.
